

## Acknowledgements

The Massachusetts Highway Department would like to acknowledge the support of the Design Guidebook Task Force, which has overseen this effort since April 2003. Task Force members, made up of bicycle and pedestrian advocates, environmentalists, municipal representatives, regional planners, MassHighway employees, and other construction and design professionals, devoted hundreds of hours to making this Guidebook a reality. We are very grateful for their service.

This Guidebook was developed by VHB/ Vanasse Hangen Brustlin, Inc. (in association with Glatting Jackson Kercher Anglin Lopez Rinehart, Inc., Texas Transportation Institute, Kessler McGuinness & Associates, LLC and Community Resources Group) under contract with the Massachusetts Highway Department. In developing this document, the consultant team worked closely with MassHighway staff, soliciting their input and comments on each chapter, and drawing upon their vast experience in planning, design, construction, and maintenance of the Commonwealth's roadway system.
