

# Table of Contents

## 1 Introduction

1.1	Purpose of the Guidebook .....	1-2
1.2	Guiding Principles of the Guidebook.....	1-2
1.2.1	Multi-Modal Consideration .....	1-3
1.2.2	Context Sensitive Design .....	1-4
1.2.3	A Clear Project Development Process.....	1-5
1.3	Use of this Guidebook .....	1-8
1.4	Structure of the Guidebook .....	1-9
1.5	Addenda and Updates .....	1-11

## 2 Project Development

2.1	Step I: Problem/Need/Opportunity Identification.....	2-5
2.1.1	Problem/Need/Opportunity Definition.....	2-6
2.1.2	Project Need Form .....	2-6
2.1.3	Transportation Evaluation Criteria .....	2-8
2.1.4	Identify Project Constituents and Public Outreach Plan .....	2-9
2.1.5	Project Planning Scope .....	2-9
2.1.6	Project Need Form Review.....	2-10
2.2	Step II: Planning.....	2-12
2.2.1	Project Planning Report .....	2-12
2.2.2	Detailed Alternatives Analysis .....	2-27
2.2.3	Review of Planning Efforts .....	2-27
2.3	Step III: Project Initiation.....	2-29
2.3.1	Project Initiation Form (Project Initiation Form) .....	2-30
2.3.2	MassHighway Project Review and Evaluation .....	2-31
2.3.3	MPO Review and Comment.....	2-33
2.4	Step IV: Environmental, Design and ROW Process .....	2-34
2.4.1	Public Outreach Plan and Requirements for the Environmental, Design, and Right-of-Way Process.....	2-36
2.4.2	Environmental Documentation and Permitting .....	2-40
2.4.3	Project Design.....	2-48
2.4.4	Right-of-Way .....	2-59

2.4.5	Completion of Environmental Permitting/Design/ Right-of-Way Process .....	2-60
2.5	Step V: Programming .....	2-63
2.6	Step VI: Procurement .....	2-66
2.7	Step VII: Construction .....	2-67
2.7.1	Public Participation During Construction .....	2-67
2.7.2	Construction Management and Monitoring .....	2-67
2.8	Step VIII: Project Assessment .....	2-68
2.9	Public Outreach .....	2-69
2.9.1	Identify Project Constituents .....	2-69
2.9.2	Public Outreach Approach .....	2-70
2.9.3	Public Outreach Tools .....	2-74
2.10	Project Development Schedule .....	2-78
2.11	Design Exceptions .....	2-80
2.11.1	Design Exception Triggers .....	2-81
2.11.2	Design Exception Documentation .....	2-81
2.11.3	Approval Process .....	2-83
2.12	For Further Information .....	2-85

Appendix

**3 Basic Design Controls**

3.1	Introduction .....	3-1
3.2	Roadway Context .....	3-1
3.2.1	Area Types .....	3-2
3.2.2	Roadway Types .....	3-8
3.2.3	Access Control .....	3-10
3.2.4	Parkways .....	3-12
3.3	Roadway Users .....	3-13
3.3.1	The Pedestrian .....	3-14
3.3.2	The Bicyclist .....	3-17
3.3.3	The Driver .....	3-19
3.3.4	Public Transit .....	3-21
3.4	Transportation Demand .....	3-22
3.4.1	Design Year .....	3-22
3.4.2	Volume and Composition of Demand .....	3-24
3.5	Measures of Effectiveness .....	3-27
3.5.1	Transportation Measures of Effectiveness .....	3-27
3.5.2	Contextual Measures of Effectiveness .....	3-29
3.6	Speed .....	3-30
3.6.1	Speed Limits .....	3-30
3.6.2	Motor Vehicle Running Speed .....	3-31

3.6.3	Motor Vehicle Operating Speed .....	3-31
3.6.4	Target Speed for Motor Vehicles .....	3-32
3.6.5	Selecting Motor Vehicles Design Speed .....	3-32
3.6.6	Design Speed and Traffic Calming .....	3-35
3.6.7	High Speeds and Safety for Pedestrian and Bicyclists .....	3-36
3.6.8	Selecting Bicycle Design Speed .....	3-36
3.6.9	Selecting Pedestrian Design Speed .....	3-37
3.7	Sight Distance .....	3-37
3.7.1	Stopping Sight Distance .....	3-37
3.7.2	Passing Sight Distance .....	3-39
3.7.3	Decision Sight Distance .....	3-39
3.7.4	Intersection Sight Distance .....	3-40
3.8	For Further Information: .....	3-50
<b>4</b>	<b>Horizontal and Vertical Alignment</b>	
4.1	Introduction .....	4-1
4.2	Horizontal Alignment .....	4-4
4.2.1	Types of Horizontal Curvature .....	4-5
4.2.2	Horizontal Stopping Sight Distance .....	4-11
4.2.3	Superelevation .....	4-15
4.2.4	Maximum Superelevation Rates and Minimum Curve Radii .....	4-16
4.2.5	Superelevation Transitioning .....	4-18
4.3	Vertical Alignment .....	4-33
4.3.1	Grades .....	4-34
4.3.2	Truck Climbing Lanes .....	4-36
4.3.3	Vertical Curves .....	4-37
4.3.4	Vertical Clearances .....	4-43
4.3.5	Establishing Profiles .....	4-45
4.4	Combination of Horizontal and Vertical Alignment .....	4-45
4.5	For Further Information .....	4-47
<b>5</b>	<b>Cross-Section and Roadside Elements</b>	
5.1	Introduction .....	5-1
5.1.1	Multimodal Accommodation and Context Sensitivity .....	5-1
5.1.2	Additional Topics Covered .....	5-2
5.2	Multimodal Accommodation .....	5-4
5.2.1	Case 1: Separate Accommodation for All Users .....	5-5
5.2.2	Case 2: Partial Sharing for Bicycles and Motor Vehicles .....	5-6
5.2.3	Case 3: Shared Bicycle/Motor Vehicle Accommodation .....	5-8
5.2.4	Case 4: Shared Bicycle/Pedestrian Accommodation .....	5-9
5.2.5	Case 5: Shared Accommodation for All Users .....	5-10

	5.2.6	Summary of Accommodation Option.....	5-11
5.3		Design Elements .....	5-13
	5.3.1	Pedestrians .....	5-13
	5.3.2	Bicycles.....	5-18
	5.3.3	Motor Vehicles.....	5-25
	5.3.4	Complete Cross-Section Guidance .....	5-33
5.4		Public Transit Operations .....	5-36
	5.4.1	Rail Transit Facilities.....	5-36
	5.4.2	Bus Stops .....	5-36
	5.4.3	Dedicated Lanes .....	5-39
5.5		Other Cross-Section Elements.....	5-40
	5.5.1	Medians and Auxiliary Lanes .....	5-40
	5.5.2	Cross Slopes.....	5-47
	5.5.3	Curbs, Berms and Edging .....	5-47
5.6		Roadside Elements .....	5-49
	5.6.1	Clear Zones .....	5-49
	5.6.2	Roadside Barriers .....	5-57
	5.6.3	Median Barriers.....	5-72
	5.6.4	Impact Energy Attenuators.....	5-78
	5.6.5	Side Slopes and Cuts.....	5-80
	5.6.6	Ditch Sections .....	5-81
5.7		Utilities and Signage .....	5-82
	5.7.1	Utility Placement or Relocation .....	5-82
	5.7.2	Signage Placement.....	5-82
5.8		Right-of-Way .....	5-83
5.9		For Further Information.....	5-85

## 6 Intersection Design

6.1		Introduction.....	6-1
	6.1.1	Intersection Users.....	6-2
	6.1.2	Intersection Design Process .....	6-3
6.2		Definitions and Key Elements .....	6-3
6.3		User Characteristics .....	6-5
	6.3.1	Pedestrians .....	6-5
	6.3.2	Bicyclists .....	6-6
	6.3.3	Motor Vehicles.....	6-7
	6.3.4	Transit .....	6-8
6.4		Intersection Types and Configurations.....	6-10
	6.4.1	Simple Intersections.....	6-10
	6.4.2	Flared Intersections .....	6-10
	6.4.3	Channelized Intersections .....	6-12

6.4.4	Roundabouts.....	6-12
6.4.5	Typical Intersection Configurations.....	6-13
6.5	Traffic Control.....	6-15
6.5.1	Traffic Control Measures .....	6-15
6.6	Intersection Capacity and Quality of Service.....	6-22
6.6.1	Capacity.....	6-22
6.6.2	Level of Service (LOS).....	6-28
6.7	Geometric Design Elements .....	6-33
6.7.1	Intersection Alignment .....	6-33
6.7.2	Pavement Corner Radius .....	6-38
6.7.3	Auxiliary Lanes .....	6-46
6.7.4	Channelization Islands .....	6-52
6.7.5	Roundabout Geometric Design Elements .....	6-55
6.7.6	Intersection Median Openings .....	6-58
6.7.7	Pedestrian Crosswalks .....	6-61
6.7.8	Pedestrian Curb Cut Ramps .....	6-64
6.7.9	Bicycle Lanes at Intersections .....	6-67
6.8	Other Considerations .....	6-73
6.8.1	Intersection Sight Triangles .....	6-73
6.8.2	Intersection Spacing.....	6-73
6.8.3	Transit Stop Considerations .....	6-75
6.8.4	Mid-Block Path Crossings .....	6-77
6.8.5	Railroad-Highway Grade Crossings .....	6-78
6.8.6	Driveways .....	6-80
6.9	For Further Information.....	6-81
<b>7</b>	<b>Interchanges</b>	
7.1	Introduction.....	7-1
7.2	Warrants and Planning Considerations .....	7-2
7.2.1	Warrants .....	7-2
7.2.2	Contextual Considerations for Interchanges .....	7-3
7.2.3	Pedestrian and Bicycle Accommodation Through Interchanges ...	7-4
7.2.4	Interchange Selection Factors .....	7-4
7.2.5	Application to Freeways and Highways with Full Access Control .....	7-5
7.2.6	Interchange Spacing.....	7-6
7.2.7	Interchange Justification/Modification Reports .....	7-7
7.3	Interchange Types .....	7-9
7.3.1	Three-Leg Interchanges.....	7-9
7.3.2	Diamond Interchanges .....	7-10
7.3.3	Cloverleaves.....	7-14

	7.3.4	Directional and Semi-Directional .....	7-17
7.4		General Design Considerations .....	7-19
	7.4.1	Interchange Type Selection .....	7-19
	7.4.2	Capacity and Level of Service .....	7-23
	7.4.3	Safety Considerations .....	7-24
7.5		Traffic Lane Principles .....	7-24
	7.5.1	Basic Number of Lanes and Freeway Lane Drops .....	7-24
	7.5.2	Lane Balance .....	7-25
	7.5.3	Auxiliary Lanes .....	7-27
	7.5.4	Distance Between Successive Ramp Terminals.....	7-27
	7.5.5	Approaches to Interchanges.....	7-30
7.6		Freeway/Ramp Junctions .....	7-31
	7.6.1	Exit Ramps .....	7-31
	7.6.2	Entrance Ramps .....	7-34
	7.6.3	Weaving Areas.....	7-37
	7.6.4	Capacity and Level of Service .....	7-40
	7.6.5	Major Forks and Branch Connections .....	7-40
7.7		Ramp Design .....	7-44
	7.7.1	Geometric Design .....	7-44
	7.7.2	Capacity .....	7-51
7.8		Ramp/Minor Road Intersections .....	7-52
7.9		For Further Information.....	7-68

## 8 Drainage and Erosion Control

8.1		Introduction .....	8-1
8.2		Procedures .....	8-2
	8.2.1	Drainage Law and the Designer's Responsibility .....	8-3
	8.2.2	Coordination With Other Agencies .....	8-7
	8.2.3	Documentation Necessary for Drainage Designs .....	8-8
8.3		Hydrology.....	8-10
	8.3.1	Design Storm Frequency .....	8-11
	8.3.2	Method of Estimating Peak Discharge .....	8-12
	8.3.3	Effects of Storage.....	8-39
8.4		Hydraulic Design.....	8-41
	8.4.1	Roadside Drainage (Open Channels) .....	8-42
	8.4.2	Culverts.....	8-61
	8.4.3	Energy Dissipators .....	8-84
	8.4.4	Storm Drain Systems.....	8-88
	8.4.5	Subdrainage Design .....	8-115
	8.4.6	Special Designs .....	8-121

8.5	Erosion Control During Construction .....	8-121
8.5.1	Vegetation .....	8-124
8.5.2	Flow Diversion.....	8-124
8.5.3	Sedimentation Checks .....	8-131
8.5.4	Sediment Basins.....	8-138
8.6	References .....	8-142

## 9 Pavement Design

9.1	Introduction to the Pavement Design Process.....	9-1
9.2	Pavement Types, Definitions, and Abbreviations.....	9-3
9.2.1	Flexible Pavement .....	9-3
9.2.2	Rigid Pavement .....	9-4
9.2.3	Composite Pavement.....	9-4
9.2.4	Other Pavement Concepts .....	9-5
9.2.5	Pavement Design Terms and Definitions .....	9-5
9.3	Typical Pavement Design Procedures for 25 Percent Submittal .....	9-7
9.3.1	Step 1 - Determine Scope of Work .....	9-9
9.3.2	Step 2 - Collect Basic Project Data .....	9-10
9.3.3	Step 3 - Determine Design Bearing Ratio (DBR).....	9-11
9.3.4	Step 4 - Assemble and Submit Pavement Design Information to PDE .....	9-12
9.3.5	Step 5- PDE Reviews Scope of Work and DBR Determination .....	9-13
9.3.6	Step 6 - PDE Reviews/Comments on the 25 Percent Design .....	9-13
9.4	Typical Pavement Design Procedures for 75 Percent Submittal .....	9-14
9.4.1	Step 7 - Design Engineer Performs and Submits Pavement Design Analysis.....	9-14
9.4.2	Step 8 - PDE Reviews Pavement Design Analysis .....	9-14
9.5	New and Reconstructed Pavements.....	9-15
9.5.1	Pavement Design Cover Sheet .....	9-16
9.5.2	Data Sheet 1: Pavement Structural Design Data .....	9-16
9.5.3	Data Sheet 2: Determining Structural Number (SN) .....	9-17
9.5.4	Data Sheet 3: Pavements Structural Number (SN) .....	9-20
9.6	Reclamation .....	9-22
9.7	Pavement Resurfacing .....	9-23
9.7.1	Pavement Resurfacing Design Cover Sheet .....	9-23
9.7.2	Data Sheet 1: Pavement Structural Design Data.....	9-23
9.7.3	Data Sheet 2: Actual SN of Existing Pavement.....	9-25
9.7.4	Data Sheet 3: Determination of Resurfacing Thickness .....	9-25
9.8	Limited Access Highway Pavement Resurfacing Design.....	9-26
9.8.1	Design Method.....	9-26
9.8.2	Serviceability.....	9-26

9.8.3	Reliability .....	9-26
9.8.4	Back-calculation .....	9-26
9.8.5	1993 AASHTO Pavement Resurfacing Design.....	9-27
9.9	Pavement Preservation.....	9-27
9.10	Typical Pavement Design for Low Volume Roads .....	9-27
9.10.1	Design Procedures .....	9-27
9.11	For Further Information.....	9-28

**Appendix**

**10 Bridges**

10.1	Introduction.....	10-1
10.2	Applications of Bridges .....	10-1
10.2.1	Pedestrian and Bicycle Facility Bridges .....	10-1
10.2.2	Highway Grade Separations .....	10-2
10.2.3	Railroad Grade Separations .....	10-4
10.2.4	Crossings of Streams, Rivers, and Other Natural Features .....	10-5
10.3	Contextual Influences on Bridge Design .....	10-6
10.3.1	Understanding the Context.....	10-7
10.3.2	Aesthetics .....	10-8
10.3.3	Historically Significant Bridges .....	10-10
10.4	Preliminary Design Guidelines .....	10-11
10.5	Major Design Elements .....	10-11
10.5.1	Superstructure .....	10-11
10.5.2	Substructure .....	10-12
10.5.3	Horizontal and Vertical Alignment .....	10-12
10.5.4	Cross-Section .....	10-12
10.5.5	Curbs and Railings .....	10-13
10.6	Inventory and Management of Bridges.....	10-14
10.7	For Further Information.....	10-15

**11 Shared Use Paths and Greenways**

11.1	Introduction.....	11-1
11.1.1	Design Considerations .....	11-2
11.2	Path Networks and Greenway Systems .....	11-2
11.2.1	Path Networks.....	11-3
11.2.2	Greenway Systems.....	11-4
11.3	Accessibility of Shared Use Paths and Trails.....	11-4
11.4	Shared Use Path Design .....	11-5
11.4.1	Path Width, Side Clearance and Vertical Clearance .....	11-6
11.4.2	One-Way Paths/Multiple Treadways .....	11-9
11.4.3	Barrier Height and Placement .....	11-10

11.4.4	Design Speed .....	11-12
11.4.5	Cross-Slopes and Superelevation .....	11-12
11.4.6	Horizontal Curvature .....	11-13
11.4.7	Sight Distance .....	11-13
11.4.8	Grade .....	11-16
11.4.9	Path-Roadway Intersections .....	11-16
11.4.10	Bridges, Overpasses, and Underpasses .....	11-20
11.4.11	Signing and Marking .....	11-22
11.4.12	Surfacing .....	11-23
11.4.13	Landscape Selection and Maintenance .....	11-25
11.4.14	Drainage.....	11-26
11.4.15	Lighting.....	11-26
11.4.16	Restriction of Motor Vehicle Traffic .....	11-26
11.4.17	Bicycle Parking.....	11-28
11.5	Greenways .....	11-29
11.6	Rail Trails .....	11-31
11.6.1	Inactive ROW .....	11-31
11.6.2	Rails with Trails.....	11-31
11.7	Maintenance .....	11-35
11.7.1	Sweeping and Debris Removal .....	11-35
11.7.2	Pavement Quality and Striping .....	11-35
11.7.3	Snow Removal .....	11-35
11.8	For Further Information.....	11-36

## 12 Intermodal Facilities and Rest Areas

12.1	Introduction.....	12-1
12.2	Park & Ride Facilities .....	12-1
12.2.1	Success Factors .....	12-2
12.2.2	Design Considerations.....	12-2
12.3	Transit Centers.....	12-6
12.3.1	Multi-Modal Safety & Accommodation .....	12-6
12.4	Rest Areas.....	12-7
12.4.1	Site Selection.....	12-7
12.4.2	Design Considerations.....	12-8
12.5	Tourist Information Centers.....	12-11
12.6	For Further Information.....	12-12

## 13 Landscape and Aesthetics

13.1	Landscape Design Objectives.....	13-1
13.2	Corridor Considerations .....	13-2
13.2.1	Public Expectations.....	13-2
13.2.2	Safety .....	13-3
13.2.3	Environment .....	13-3
13.2.4	Utilities.....	13-4
13.2.5	Roadway Maintenance .....	13-4
13.3	Landscape Design Guidance .....	13-4
13.3.1	Streetscapes .....	13-5
13.3.2	Natural Site Landscape Treatments.....	13-14
13.3.3	Noise Walls.....	13-24
13.3.4	Bridges.....	13-25
13.3.5	Traffic Barriers .....	13-26
13.4	Plant Material Selection.....	13-27
13.4.1	General Plant Material Selection Guidelines .....	13-27
13.4.2	Plant Selection for Streetscape.....	13-32
13.4.3	Plant Selection for Natural Sites .....	13-34
13.5	Plant Protection and Preservation .....	13-38
13.5.1	Tree Structure.....	13-38
13.5.2	Evaluation of Construction and Project Impacts.....	13-40
13.5.3	Assessing Vegetation for Preservation.....	13-41
13.5.4	Plants Requiring Removal.....	13-43
13.5.5	Determining Tree Protection Zone.....	13-43
13.5.6	Design Measures to Preserving & Protecting Trees .....	13-44
13.5.7	Construction Measures to Preserve & Protect Trees .....	13-44
13.6	Plans and Documentation.....	13-46
13.7	For Futher Information .....	13-47

## 14 Wildlife Accommodation

14.1	Types of Effects .....	14-7
14.1.1	Wildlife Vehicle Collisions .....	14-7
14.1.2	Habitat Loss.....	14-9
14.1.3	Habitat Fragmentation.....	14-9
14.1.4	Altered Habitat Quality .....	14-11
14.2	Types of Wildlife Accommodation.....	14-12
14.2.1	Signage .....	14-14
14.2.2	Public Education and Awareness .....	14-14
14.2.3	Reduced Speed Limits.....	14-15
14.2.4	Habitat Alteration .....	14-15
14.2.5	Modified Jersey Barriers .....	14-16

14.2.6	Fencing .....	14-16
14.2.7	Wildlife Crossing Structures.....	14-17
14.3	Wildlife Accommodation Guidelines .....	14-20
14.3.1	Design Guidelines.....	14-21
14.3.2	Other Guidelines.....	14-22
14.4	Conclusions .....	14-24
14.5	For Further Information.....	14-25
<b>15</b>	<b>Access Management</b>	
15.1	Relationship to Context.....	15-2
15.1.1	Area Types.....	15-2
15.1.2	Roadway Type.....	15-2
15.2	The Commonwealth's Role in Managing Access .....	15-4
15.2.1	Access Guidelines.....	15-4
15.2.2	Monitoring, Reviewing and Responding to New Development ....	15-5
15.2.3	Driveway Design .....	15-6
15.3	Access Management Techniques.....	15-12
15.3.1	Turning Treatments .....	15-12
15.3.2	Median Treatments.....	15-13
15.3.3	Signal Spacing and Timing.....	15-14
15.3.4	Inter-Parcel Connections and Internal Roadway System .....	15-15
15.3.5	Frontage Roads.....	15-15
15.3.6	Full Access Control Highways .....	15-17
15.4	Land Use Controls.....	15-18
15.4.1	Zoning and New Development .....	15-19
15.4.2	Highway Corridor Overlay District .....	15-19
15.6.2	Retrofitting Existing Development .....	15-22
15.7	For Further Information.....	15-23
<b>16</b>	<b>Traffic Calming and Traffic Management</b>	
16.1	Introduction.....	16-1
16.2	Potential Benefits and Impacts .....	16-2
16.3	Applicability to Settings and Roadways .....	16-5
16.4	Spacing and Frequency of Measures .....	16-7
16.5	Measures to Narrow the Apparent Width.....	16-7
16.5.1	Building Placement.....	16-8
16.5.2	Street Furniture.....	16-11
16.5.3	Street Lighting .....	16-12
16.5.4	Street Trees .....	16-12
16.5.5	Raised Curbs.....	16-12
16.5.6	Curbside Parking.....	16-13

16.5.7	Spot Narrowing of Pavement .....	16-15
16.5.8	Medians and Crossing Islands .....	16-16
16.5.9	Allocation of Pavement Width and Road Diets .....	16-19
16.5.10	Gateways .....	16-23
16.6	Traffic Calming Measures Incorporating Deflection .....	16-24
16.6.1	Mid-Block Deflection Measures .....	16-24
16.6.2	Intersection Measures .....	16-27
16.7	Measures to Alter the Street Profile or Texture .....	16-31
16.7.1	Speed Humps .....	16-31
16.7.2	Raised Crosswalks (Flat-Top Speed Humps) .....	16-33
16.7.3	Raised Intersections .....	16-33
16.7.4	Textured Pavement .....	16-33
16.7.5	Rumble Strips .....	16-34
16.8	Traffic Management Measures .....	16-34
16.8.1	Restriction of Vehicle Movements through Street Design .....	16-35
16.8.2	Regulatory Measures to Restrict Vehicle Movements .....	16-36
16.9	Administering a Traffic Calming Program .....	16-37
16.10	Traffic Calming and Tort Liability .....	16-37
16.11	For Further Information .....	16-38
<b>17</b>	<b>Work Zone Management</b>	
17.1	Introduction .....	17-1
17.2	Public Information .....	17-2
17.3	Coordination .....	17-3
17.4	Work Zone Categories .....	17-3
17.4.1	Road Closures .....	17-3
17.4.2	Time Restrictions .....	17-4
17.4.3	Stationary Work Zones .....	17-5
17.4.4	Mobile Work Zones .....	17-7
17.5	Work Zone Safety .....	17-9
17.5.1	Worker Safety .....	17-9
17.5.2	Road User Safety .....	17-9
17.6	Temporary Traffic Control (TTC) Plans .....	17-15
17.7	For Further Information .....	17-17
<b>18</b>	<b>Plans, Specifications, and Cost Estimates</b>	
18.1	Introduction .....	18-1
18.2	Construction Plans .....	18-1
18.2.1	Base Plans .....	18-1
18.2.2	Final Plans .....	18-17

18.3	Decree Plans .....	18-46
18.4	Layout Plans .....	18-46
18.5	Right of Way Plans .....	18-53
18.5.1	General .....	18-54
18.5.2	Preliminary Right-of-Way Plans .....	18-56
18.5.3	Final Right-of-Way Plans .....	18-56
18.5.4	Format of Right-of-Way Plans .....	18-56
18.6	Specifications .....	18-59
18.6.1	Procedure .....	18-60
18.6.2	Format and Content .....	18-60
18.6.3	Coordination With the Drawings .....	18-63
18.6.4	Language .....	18-64
18.7	Estimates .....	18-67
18.7.1	Types of Project Estimates .....	18-67
18.7.2	Procedures for Submitting Estimates for Computer Processing .....	18-72
18.7.3	Office Calculation Book .....	18-73

## List of Exhibits

### 2 Project Development

Exhibit 2-1	Overview of Project Development .....	2-4
Exhibit 2-2	Step I: Problem/Need/Opportunity Identification .....	2-7
Exhibit 2-3	Likely Planning Approaches for Different Types of Projects.....	2-13
Exhibit 2-4	Overview of Project Planning Tasks .....	2-14
Exhibit 2-5	Example of Visual Representation of a Project Alternative .....	2-25
Exhibit 2-6	Step III: Project Initiation .....	2-29
Exhibit 2-7	Environmental, Design and ROW Processes .....	2-35
Exhibit 2-8	Project Design Process (in process) .....	2-37
Exhibit 2-9	Typical Public Outreach Approach for Different Types of Projects .....	2-70
Exhibit 2-10	Typical Public Meetings during Project Development .....	2-76
Exhibit 2-11	Project Development Schematic Timetable.....	2-79

### 3 Basic Design Controls

Exhibit 3-1	Rural Area Types .....	3-5
Exhibit 3-2	Suburban Area Types.....	3-6
Exhibit 3-3	Urban Area Types.....	3-7
Exhibit 3-4	Conceptual Framework of Roadway Type .....	3-9
Exhibit 3-5	Schematic Representation of Roadway Type .....	3-9
Exhibit 3-6	Design Vehicle Dimensions .....	3-20
Exhibit 3-7	Design Speed Ranges (Miles per Hour) .....	3-34
Exhibit 3-8	Motor Vehicle Stopping Sight Distances.....	3-38
Exhibit 3-9	Decision Sight Distances.....	3-40
Exhibit 3-10	Sight Triangle Case A .....	3-43
Exhibit 3-11	Sight Triangle Case B .....	3-45
Exhibit 3-12	Sight Triangle Case C .....	3-47
Exhibit 3-13	Roundabout Intersection Sight Distance: Computed Length of Conflicting Leg.....	3-48
Exhibit 3-14	Case F Intersection Sight Distance.....	3-49

### 4 Horizontal and Vertical Alignment

Exhibit 4-1	Simple Circular Curve.....	4-6
Exhibit 4-2	Compound Curve Layout .....	4-9
Exhibit 4-3	Compound Curvature Transition .....	4-10
Exhibit 4-4	Sight Distance on a Curve .....	4-12

Exhibit 4-5	Horizontal Stopping Sight Distance Criteria .....	4-13
Exhibit 4-6	Method of Cutting Slope for Horizontal Sight Distance .....	4-14
Exhibit 4-7	Superelevation for Left and Right Turning Curves.....	4-15
Exhibit 4-8	Minimum Design Radii for Common Superelevation Rates .....	4-17
Exhibit 4-9	Minimum Radius (ft) with Low or No Superelevation .....	4-18
Exhibit 4-10	Methods of Attaining Superelevation .....	4-19
Exhibit 4-11	Superelevation on Compound Curves.....	4-21
Exhibit 4-12	Banking Undivided Highways – Rotation Around Centerline.....	4-23
Exhibit 4-13	Banking Undivided Highways – Rotation About Inside Edge .....	4-24
Exhibit 4-14	Banking Undivided Highways – Rotation about Outside Edge .....	4-25
Exhibit 4-15	Undivided Highways – Straight Cross Slope, Rotation About Outside Edge .....	4-26
Exhibit 4-16	Highway with Paved Shoulders .....	4-27
Exhibit 4-17	Banking Divided Highways – Rotation About Median Edge.....	4-29
Exhibit 4-18	Minimum Radii for Design Superelevation Rates, Design Radius and Design Speeds .....	4-31
Exhibit 4-19	Superelevation Runoff Length for Design Superelevation and Design Speed .....	4-32
Exhibit 4-20	Maximum Relative Gradients .....	4-33
Exhibit 4-21	Recommended Maximum Grades.....	4-35
Exhibit 4-22	Speed-Distance Curves for a Typical Heavy Truck for Deceleration on Upgrades .....	4-36
Exhibit 4-23	Parabolic Vertical Curves.....	4-39
Exhibit 4-24	Parabolic Vertical Curves.....	4-40
Exhibit 4-25	Parabolic Vertical Curves.....	4-41
Exhibit 4-26	Design Control for Stopping Sight Distance for Crest Vertical Curves.....	4-42
Exhibit 4-27	Design Control for Sag Vertical Curves .....	4-44
Exhibit 4-28	Vertical Clearances.....	4-44

## 5 Cross Section and Roadside Elements

Exhibit 5-1	Case 1: Separate Accommodation For All Users .....	5-5
Exhibit 5-2	Case 2: Partial Sharing for Bicycles and Motor Vehicles .....	5-7
Exhibit 5-3	Case 3: Shared Bicycle/Motor Vehicle Accommodations .....	5-8
Exhibit 5-4	Case 4: Shared Pedestrian/Bike Accommodation.....	5-9
Exhibit 5-5	Case 5: Shared Accommodation for All Users .....	5-11
Exhibit 5-6	Summary of Multi-modal Accommodation Options .....	5-12
Exhibit 5-7	Clear Accessible Path .....	5-15
Exhibit 5-8	Typical Shy Distances Between Street Elements and Effective Pedestrian Path .....	5-16
Exhibit 5-9	Bicycle Lane Pavement Markings.....	5-22
Exhibit 5-10	Shared Street Pavement Markings .....	5-24
Exhibit 5-11	Minimum Shoulder Width (in feet) to Provide Various Functions .....	5-26
Exhibit 5-12	Widths of Usable Shoulders (In Feet) .....	5-27
Exhibit 5-13	Usable Shoulders.....	5-27

Exhibit 5-14	Range of Travel Lane Widths (In Feet) .....	5-31
Exhibit 5-15	Typical Median Functions by Roadway Type .....	5-46
Exhibit 5-16	Typical Curb Heights .....	5-48
Exhibit 5-17	Illustration of Clear Zones, Slopes, and Runout Areas.....	5-50
Exhibit 5-18	Longitudinal Slope Influences on Clear Zone Distances .....	5-52
Exhibit 5-19	Recommended Clear Zone Distances.....	5-53
Exhibit 5-20	Kcz (Curve Correction Factor) (U.S. Customary Units) .....	5-54
Exhibit 5-21	Preferred Ditch Cross-section .....	5-55
Exhibit 5-22	Preferred Trapezoidal Channel Cross-section.....	5-56
Exhibit 5-23	Barrier Warrants for Non-Traversable Terrain and Roadside Obstacles 1,2 .....	5-62
Exhibit 5-24	Comparative Risk Warrants For Embankments.....	5-63
Exhibit 5-25	Example design chart for Embankment Warrants Based on Fill height, slope, and traffic volume .....	5-64
Exhibit 5-26	Example design chart for cost-effectiveness embankment warrants based on traffic speeds and volumes, slope geometry, and length of slope .....	5-64
Exhibit 5-27	Selection Criteria for Roadside Barriers .....	5-65
Exhibit 5-28	Suggested Shy Line Offset (Ls) Values.....	5-66
Exhibit 5-29	Barrier Offset Distance .....	5-67
Exhibit 5-30	Approach Barrier Layout Variables .....	5-68
Exhibit 5-31	Suggested Flare Rates for Barrier Design .....	5-69
Exhibit 5-32	Suggested Runout Lengths for Barrier Design (LR) .....	5-69
Exhibit 5-33	Median Barrier Warrants .....	5-75

## 6 Intersection Design

Exhibit 6-1	Definitions .....	6-4
Exhibit 6-2	Typical Design Motor Vehicles at Intersections.....	6-8
Exhibit 6-3	Vehicle Turning Template.....	6-9
Exhibit 6-4	Intersection Types.....	6-11
Exhibit 6-5	Intersecting Street Configuration and Nomenclature.....	6-14
Exhibit 6-6	Computing Critical Lane Volume.....	6-26
Exhibit 6-7	Traffic Flow Related to Critical Lane Volumes .....	6-27
Exhibit 6-8	Pedestrian Level of Service (LOS) Criteria at Intersections .....	6-28
Exhibit 6-9	Bicycle Level of Service (LOS) Criteria at Signalized Intersections.....	6-29
Exhibit 6-10	Motor Vehicular Level of Service (LOS) Criteria at Intersections .....	6-30
Exhibit 6-11	Common Intersection Level-of-Service Ranges by User Group and Area Type.....	6-32
Exhibit 6-12	Horizontal Alignment Guidelines at Intersections.....	6-34
Exhibit 6-13	Vertical Alignment Guidelines.....	6-35
Exhibit 6-14	Pavement Cross-slope at Intersections.....	6-37
Exhibit 6-15	Typical Encroachment by Design Vehicle .....	6-40
Exhibit 6-16	Methods for Pavement Corner Design .....	6-41
Exhibit 6-17	Effective Pavement Widths .....	6-41

Exhibit 6-18	Simple Radius for Corner Design (Feet) .....	6-43
Exhibit 6-19	Curve and Taper Corner Design .....	6-44
Exhibit 6-20	Turning Roadways and Islands .....	6-45
Exhibit 6-21	Left-Turn Lane Design Guidelines .....	6-47
Exhibit 6-22	Right-Turn Lane Design Guidelines .....	6-48
Exhibit 6-23	Criteria for Left Turn Lanes .....	6-50
Exhibit 6-24	Criteria for Right-Turn Lane Placement .....	6-50
Exhibit 6-25	Auxiliary Through-Lane Design Guidelines .....	6-51
Exhibit 6-26	Channelization Islands .....	6-54
Exhibit 6-27	Circle Dimensions, Single Lane Roundabout .....	6-56
Exhibit 6-28	Entry/Exit Lanes, Single Lane Roundabouts .....	6-58
Exhibit 6-29	Median Openings .....	6-60
Exhibit 6-30	Crosswalk Elements .....	6-62
Exhibit 6-31	Bicycle Accommodation at a Simple Intersection .....	6-69
Exhibit 6-32	Bicycle Accommodation at a Flared Intersection .....	6-71
Exhibit 6-33	Bicycle Accommodations at Roundabouts .....	6-73
Exhibit 6-34	Intersection Space Guidelines .....	6-74

## 7 Interchanges

Exhibit 7-1	Three-leg Interchanges .....	7-10
Exhibit 7-2	Typical Diamond Interchange (Schematic) .....	7-13
Exhibit 7-3	Single Point Urban Interchange .....	7-14
Exhibit 7-4	Full Cloverleafs .....	7-15
Exhibit 7-5	Partial Cloverleaf Arrangements .....	7-16
Exhibit 7-6	Semidirect Interchanges with Weaving .....	7-18
Exhibit 7-7	Semidirect Interchanges without Weaving .....	7-18
Exhibit 7-8	Semidirect and Directional Interchanges - Multilevel Structures .....	7-19
Exhibit 7-9	Interchanges on Freeways as Related to Types of Intersecting Facilities and Surrounding Area .....	7-22
Exhibit 7-10	Coordination of Lane Balance and Basic Number of Lanes .....	7-26
Exhibit 7-11	Alternatives in Dropping Auxiliary Lanes .....	7-29
Exhibit 7-12	Recommended Minimum Ramp Terminal Spacing .....	7-30
Exhibit 7-13	Minimum Deceleration Lengths for Exit Terminals with Flat Grades of 2% or Less .....	7-32
Exhibit 7-14	Minimum Acceleration Lengths for Entrance Terminals with Flat Grades of 2% or Less .....	7-35
Exhibit 7-15	Speed Change Lane Adjustment Factors as a Function of Grade .....	7-36
Exhibit 7-16	Weaving Areas .....	7-37
Exhibit 7-17	Weaving Configuration .....	7-39
Exhibit 7-18	Capacity of Ramp Configurations .....	7-41
Exhibit 7-19	Major Forks .....	7-43
Exhibit 7-20	Branch Connections .....	7-44
Exhibit 7-21	Guide Values For Design Speed based on Highway Design Speed .....	7-45
Exhibit 7-22	Typical Sections for Ramps in Fill Areas .....	7-47

Exhibit 7-23	Ramp Section in Cut Areas .....	7-48
Exhibit 7-24	Minimum Radii for Interchange Ramp Curves .....	7-50
Exhibit 7-25	Two-Lane Exit Terminals .....	7-50
Exhibit 7-26	Ramp Gradient Guidelines .....	7-51
Exhibit 7-27	Approximate Service Volumes for Single-lane Ramps .....	7-52
Exhibit 7-28	Bicycle Lane Crossing of Diverging Ramp .....	7-55
Exhibit 7-29	Bicycle Lane Crossing of Merging Ramp .....	7-56
Exhibit 7-30a	Freeway Exit at Interchange (Via Outer Connection of Cloverleaf-Type Ramp) .....	7-57
Exhibit 7-30b	Freeway Exit at Interchange (Via Inner Loop Connection of Cloverleaf-Type Ramp) .....	7-58
Exhibit 7-30c	Freeway Exit at Diamond Interchange .....	7-59
Exhibit 7-30d	Freeway Entrance at Interchange (From Outer Connection of Cloverleaf Type Ramp) .....	7-60
Exhibit 7-30e	Freeway Entrance at Interchange (From Inner Connection of Cloverleaf-Type Ramp) .....	7-61
Exhibit 7-30f	Freeway Entrance at Interchange (Diamond-Type Ramp) .....	7-61
Exhibit 7-30g	Freeway Entrance - Exit at Interchange (Inner Loop Entrance - Inner Loop Exit of Cloverleaf-Type Ramp) .....	7-62
Exhibit 7-30h	Partial Cloverleaf-Type Ramp/Minor Road Intersection.....	7-63
Exhibit 7-30i	Partial Cloverleaf-Type Ramp at Local Roadway .....	7-64
Exhibit 7-30j	Diamond-Type Ramp at a Local Roadway with High Levels of Bicycle and Pedestrian Activity .....	7-66
Exhibit 7-30k	Partial Cloverleaf-Type Ramp at a Local Roadway with High Levels of Bicycle and Pedestrian Activity .....	7-67

## 8 Drainage and Erosion Control

Exhibit 8-1	Floodway Schematic .....	8-7
Exhibit 8-2	Recommended Design Flood Frequency <sup>1</sup> .....	8-11
Exhibit 8-3	Hydrologic Methods Used in Massachusetts .....	8-12
Exhibit 8-4	USGS Method: Extremes of Basin Characteristics in Base-Data Network...	8-15
Exhibit 8-5	Gaging Station Network Used in Flood-Frequency Analysis.....	8-16
Exhibit 8-6a	Selected Basin and Flood Characteristics for Gaged Stations – Eastern Region .....	8-17
Exhibit 8-6b	Selected Basin and Flood Characteristics for Gaged Stations – Central Region .....	8-18
Exhibit 8-6c	Selected Basin and Flood Characteristics for Gaged Stations – Western. Region .....	8-19
Exhibit 8-7	Equations for USGS Method .....	8-21
Exhibit 8-8	Recommended Runoff Coefficients (C) for Rational Method (By Overall Character of Area) .....	8-24
Exhibit 8-9	Recommended Runoff Coefficients (C) For Rational Method (For Surface Type) .....	8-24

Exhibit 8-10	Recommended Ca Values (Rational Method) (Greater Than 10-year Design Runoff) .....	8-25
Exhibit 8-11	Average Velocities for Overland Flow .....	8-26
Exhibit 8-12	Intensity - Duration - Frequency Curve for Boston, MA.....	8-27
Exhibit 8-13	Intensity - Duration - Frequency Curve for Barnstable, MA .....	8-28
Exhibit 8-14	Intensity - Duration - Frequency Curve for Worcester, MA .....	8-29
Exhibit 8-15	Intensity - Duration - Frequency Curve for Springfield, MA.....	8-30
Exhibit 8-16	Intensity - Duration - Frequency Curve for Pittsfield, MA.....	8-31
Exhibit 8-17	Runoff Curve Numbers for Urban Areas .....	8-36
Exhibit 8-18	Runoff Curve Numbers For Other Agricultural Lands .....	8-37
Exhibit 8-19	Rainfall Data Map .....	8-38
Exhibit 8-20	Peak Discharge Determination.....	8-39
Exhibit 8-21	Types of Roadside Drainage Controls.....	8-43
Exhibit 8-22	Manning Roughness Coefficient, n .....	8-47
Exhibit 8-23	Permissible Velocities for Channels with Erodible Linings .....	8-49
Exhibit 8-24	Permissible Velocities for Channels Lined with Grass .....	8-49
Exhibit 8-25	Hydraulic Elements of Channel Sections .....	8-50
Exhibit 8-26	Partial Area of Flow in a Circular Pipe (Values of C).....	8-51
Exhibit 8-27	Trapezoidal Channel - Example 1 .....	8-53
Exhibit 8-28	Depth of Flow in a Trapezoidal Channel .....	8-54
Exhibit 8-29	Grassed Channels - Example 2.....	8-56
Exhibit 8-30	Nomograph for Solution of Manning Equation - Example 3.....	8-58
Exhibit 8-31	Characteristics of Channel Linings .....	8-61
Exhibit 8-32	Culvert Definition Sketch.....	8-64
Exhibit 8-33	Inlet Control .....	8-64
Exhibit 8-34	Outlet Control .....	8-65
Exhibit 8-35	Example 1 - HEC #10 .....	8-73
Exhibit 8-36	Example 2 - HEC #5 Documentation Form .....	8-75
Exhibit 8-37	Example 2 - HEC #5.....	8-76
Exhibit 8-38	Example 2 - HEC #5.....	8-77
Exhibit 8-39	Example 3 - HEC #10 .....	8-79
Exhibit 8-40	Example 4 - HEC #5 Documentation Form .....	8-80
Exhibit 8-41	Example 4 - HEC #5.....	8-82
Exhibit 8-42	Example 4 - HEC #5.....	8-83
Exhibit 8-43	Energy Dissipators .....	8-87
Exhibit 8-44	Energy and Hydraulic Grade Lines for a Properly and Improperly Designed Storm Sewer .....	8-90
Exhibit 8-45	Width of Spread.....	8-91
Exhibit 8-46	Grate Inlet Efficiency (E) .....	8-93
Exhibit 8-47	Gutter Capacity - Example Problem .....	8-96
Exhibit 8-48	Recommended Cover (Reinforced Concrete Drain Pipe) .....	8-100
Exhibit 8-49	Worksheet for Storm Drain Design .....	8-102
Exhibit 8-50	Concrete Pipe Flowing Full.....	8-104
Exhibit 8-51	Circular Corrugated Pipe Flowing Full.....	8-105
Exhibit 8-52	Worksheet for HGL Computations.....	8-107

Exhibit 8-53	Manhole Bend Losses.....	8-109
Exhibit 8-54	Example Problem - Storm Drain System .....	8-111
Exhibit 8-55	Example Problem - Storm Drain System .....	8-112
Exhibit 8-56	Stone Bleeders on Fills .....	8-117
Exhibit 8-57	Location of Foundation Drains.....	8-118
Exhibit 8-58	Subdrains in Earth Cuts.....	8-119
Exhibit 8-59	Subdrains in Medians.....	8-120
Exhibit 8-60	Temporary Diversion Channel .....	8-126
Exhibit 8-61	Typical Conditions Where Temporary Slope Drains are Acceptable.....	8-127
Exhibit 8-62	Typical Conditions Where Temporary Slope Drains are Acceptable.....	8-128
Exhibit 8-63	Temporary Diversion Ditch.....	8-129
Exhibit 8-64	Temporary Berms.....	8-130
Exhibit 8-65	Typical Conditions Where Silt Fences are Applicable.....	8-132
Exhibit 8-66	Typical Conditions Where Silt Fences are Applicable.....	8-133
Exhibit 8-67	Typical Conditions Where Silt Fences are Applicable.....	8-134
Exhibit 8-68	Hay Bale Dams Used Along Bottom of Slope .....	8-135
Exhibit 8-69	Baled Hay or Straw Erosion Checks.....	8-136
Exhibit 8-70	Baled Hay or Straw Erosion Checks.....	8-137
Exhibit 8-71	Typical Excavated Sediment Trap .....	8-140
Exhibit 8-72	Sediment Basin.....	8-141

## 9 Pavement Design

Exhibit 9-1	Pavement Courses for Flexible Pavement Structure.....	9-4
Exhibit 9-2	Equivalent 18-Kip Axle Applications per 1,000 Trucks for Flexible Pavements .....	9-7
Exhibit 9-3	25 Percent Design Activities.....	9-8
Exhibit 9-4	Design Bearing Ratio Determination.....	9-11
Exhibit 9-5	DBR Based on AASHTO Soils Classification.....	9-12
Exhibit 9-6	75 Percent Design Activities.....	9-14
Exhibit 9-7	DBR versus SSV Soil Support Value (SSV).....	9-18
Exhibit 9-8	Structural Number Nomograph (For Flexible Pavements P=2.5) .....	9-19
Exhibit 9-9	Layer Coefficients for New and Reconstructed Pavements.....	9-21
Exhibit 9-10	Layer Coefficients for New and Reconstructed Pavements.....	9-21
Exhibit 9-11	Minimum Pavement Thickness (New and Reconstructed Flexible Pavements) .....	9-22
Exhibit 9-12	Layer Coefficients for Existing Pavements .....	9-24
Exhibit 9-13	Reduction Factors for Existing Pavement.....	9-24

## 11 Shared Use Paths and Greenways

Exhibit 11-1	Distinction between Shared Use Path and Greenway.....	11-2
Exhibit 11-2	Shared Use Path Dimensions.....	11-8
Exhibit 11-3	Cross-Section of Shared Use Path with Multiple Treadways .....	11-10
Exhibit 11-4	Barrier Elements.....	11-12
Exhibit 11-5	Minimum Curve Radii .....	11-13

Exhibit 11-6	Minimum Stopping Sight Distance .....	11-14
Exhibit 11-7	Maximum Grade Lengths for Bicycles .....	11-16
Exhibit 11-8	Path Crossings at Intersections .....	11-17
Exhibit 11-9	Bridge Treatments for a Path .....	11-21
Exhibit 11-10	Path Underpass .....	11-22
Exhibit 11-11	Typical Path Pavement Design .....	11-25
Exhibit 11-12	Root Barriers .....	11-25
Exhibit 11-13	Bollard Placement .....	11-27
Exhibit 11-14	Splitter Island Treatment .....	11-28
Exhibit 11-15	USDA Forest Service Accessibility Guide Signs .....	11-30
Exhibit 11-16	Recreational Trail Guidelines .....	11-30
Exhibit 11-17	Separation Between Track and Path .....	11-33
Exhibit 11-18	Recommended Separation between Active Rail Lines and Paths .....	11-33
Exhibit 11-19	Methods to Provide Additional Width for Path Development .....	11-34

## 12 Intermodal Facilities and Rest Areas

Exhibit 12-1	Minimum Parking Requirements .....	12-9
Exhibit 12-2	Minimum Rest Room Requirements .....	12-10

## 13 Landscape and Aesthetics

Exhibit 13-1	Back of Sidewalk Planting .....	13-10
Exhibit 13-2	Typical Landscape Cross-Sections at Natural Sites .....	13-16
Exhibit 13-3	Bioengineering Stabilization with Stone .....	13-22
Exhibit 13-4	Selective List of Invasive or Potentially Invasive Ornamental Plants .....	13-31
Exhibit 13-5	Suggested Street Trees .....	13-33
Exhibit 13-6	Tree Structure and Functions .....	13-40
Exhibit 13-7	Tree Protection .....	13-45

## 14 Wildlife Accommodation

Exhibit 14-1	Wildlife Accommodation Requirement Scenarios .....	14-4
Exhibit 14-2	Wildlife Crossings - Amphibian Tunnel .....	14-5
Exhibit 14-3	Wildlife Crossings - Extended Bridge .....	14-6

## 15 Access Management

Exhibit 15-1	Basic Driveway Dimension Guidelines .....	15-7
Exhibit 15-2	Intersection Functional Boundary .....	15-10
Exhibit 15-3	Frontage Road Concepts .....	15-16

## 16 Traffic Calming and Traffic Management

Exhibit 16-1	Vehicle Speed and Pedestrian Fatality Rate .....	16-3
Exhibit 16-2	Traffic Calming and Traffic Management Applicability by Roadway Type .....	16-6
Exhibit 16-3	Elements of Apparent Street Width .....	16-8

Exhibit 16-4	Building Siting Guidelines .....	16-10
Exhibit 16-5	Desirable Street Furniture Setbacks .....	16-11
Exhibit 16-6	Curbside Parking .....	16-14
Exhibit 16-7	Mid-block Street Narrowing .....	16-15
Exhibit 16-8	Median Islands .....	16-17
Exhibit 16-9	Parking on Median Islands .....	16-18
Exhibit 16-10	Bicycle Lanes .....	16-20
Exhibit 16-11	Left-turn Lanes, Traffic Calming Values .....	16-22
Exhibit 16-12	Gateways .....	16-23
Exhibit 16-13	Low-speed Design Parameters .....	16-24
Exhibit 16-14	Mid-block Decedion .....	16-25
Exhibit 16-15	Lane Offsets from Parking .....	16-26
Exhibit 16-16	Intersection Curb Extensions .....	16-28
Exhibit 16-17	Speed Humps and Speed Tables .....	16-32
Exhibit 16-18	Diagonal Street Closure .....	16-35

## 17 Work Zones

Exhibit 17-1	Measured Average Work Zone Capacities .....	17-5
Exhibit 17-2	Long Term Stationary Work Zone .....	17-6
Exhibit 17-3	Suggested Work Zone Warning Sigh Spacing .....	17-7
Exhibit 17-4	Mobile Work Zone Operation .....	17-8
Exhibit 17-5	Crosswalk Closures and Pedestrian Detours .....	17-11
Exhibit 17-6	Component Parts of a Temporary Traffic Control Zone .....	17-16

## 18 Plans, Specifications and Cost Estimates

Exhibit 18-1	Plan Symbols .....	18-3
Exhibit 18-2	Abbreviations .....	18-6
Exhibit 18-3	Base Plan .....	18-7
Exhibit 18-4	Relation of Datum Planes .....	18-8
Exhibit 18-5	Sample Existing Ground Cross-sections .....	18-14
Exhibit 18-6	Symbols for Detailing Sections .....	18-15
Exhibit 18-7	Sample of Standard Drawing Set .....	18-19
Exhibit 18-8	Sample Construction Plan .....	18-20
Exhibit 18-9	Data for Construction Plans .....	18-21
Exhibit 18-10	Symbol for Proposed Design .....	18-22
Exhibit 18-11	Sample Roadway Profile .....	18-29
Exhibit 18-12	Sample Grading & Tie Plan .....	18-32
Exhibit 18-13	Sample Finished Ground Cross-section .....	18-33
Exhibit 18-14	Sample of Title Sheet for Construction Plans .....	18-37
Exhibit 18-15	Sample of Index Plan .....	18-39
Exhibit 18-16	Sample Key Plan and Boring Location Plan .....	18-40
Exhibit 18-17	Sample Boring Logs Plan .....	18-41
Exhibit 18-18	Notes: Pavement for (Name or Rte. No,) .....	18-42
Exhibit 18-19	Sample Typical Sections .....	18-44

Exhibit 18-20	Sample Wheelchair Ramp Details .....	18-45
Exhibit 18-21	Sizes of Standard Tracings .....	18-50
Exhibit 18-22	Data for Layout Plan and Title Sheet .....	18-52
Exhibit 18-23	Symbols for Layout Tracings .....	18-53
