Re: Letter of Availability  
Greenport Sewage Treatment Plant  
CE T82B

Dear Mr. Kontokosta:

The Village of Greenport has requested that Cameron Engineering & Associates, LLC provide this Letter of Availability pertaining to the proposed 128 unit affordable housing project.

It is our understanding that the proposed project will generate approximately 38,400 gallons per day. The Village's Sewage Treatment Plant is currently permitted to accept up to 650,000 gallons per day. The daily average flow to the facility is currently well below 400,000 gallons per day. Based on these conditions, there is adequate capacity to accept the estimated flow of 38,400 gallons per day from the project.

At the appropriate time, we would be interested in reviewing the details pertaining to the actual connection to the Village's collection system. Please keep us apprised of the project's progress with respect to the sewage connection activities.

Should you have any questions or require additional information, please do not hesitate to contact our office.

Very truly yours,

Mark Wagner, CEP  
Associate

Re: Northwind Village Development / Sewer Service

Dear Mr. Kontokosta:

The Village of Greenport is prepared to provide sewer service for the above referenced project.

Please send to this office the details of this project including the number of units and the type of units to be constructed. This information will be used by the village engineer to file the application with the NYS Department of Conservation.

Please contact this office at (631) 477-1748 if any further assistance is needed.

Yours truly,  
GREENPORT UTILITIES
