

PVD/T. F. Green Airport Supplemental Scoping Meeting

FEBRUARY 8, 2005

The Federal Aviation Administration (FAA) is restarting the Environmental Impact Statement (EIS) process for the T.F. Green Airport Improvement Projects. A public meeting will be held to develop a supplemental scope of technical analysis for the EIS.

What is Scoping?

Scoping is used to determine the range of alternatives, issues, and impacts that the EIS will address. Scoping provides the public with the opportunity to contribute to the technical direction and analysis of the EIS and to contribute information that could be relevant to evaluation of the impacts of the proposed action.

Why is there Supplemental Scoping?

Additional or supplemental scoping is being held for this project because the scope and alternatives for the project have changed.

The FAA is hosting the T. F. Green Airport Improvement Projects Scoping Meeting for the general public will be held on:

**February 8, 2005
5 PM to 8 PM
at the Radisson Hotel
2081 Post Road, Warwick**

This meeting will allow the public to talk with the FAA and the EIS consultant team and will include a presentation about the project and the EIS process. Scoping comments can be submitted, orally and in writing, at the Scoping Meeting, or by mail.

For more information – see the project web site www.vhb.com/pvd/eis.
